DESCRIPTION

This electric tab cutter allows you to create your tab dividers in-house quickly and easily. It can be programmed to cut between 2 and 31 dividers at the touch of a button. In auto-mode the paper guide steps through the tab positions after each cut, allowing collated sets to be produced in order. The auto advance can also be turned off and stepped through tab by tab. The digital display indicates the number of the dividers being cut so you can clearly monitor your job's progression.

FEATURES	BENEFITS
Up to 500 sets of 9 tabs cut in less than 1 hour.	Faster productivity.
Can cut 35-40 sheets in a single stroke.	Cuts down on repetitive work.
Up to 31 tabs or index dividers to any length up to 320mm.	Makes this versatile machine, ideal for many different applications.
Digital adjustment.	Very easy and quick to set-up with little training necessary.
Foot pedal operation.	To help speed up production.
15 jobs can be programmed in to machine for future use	Great for repeat or regular jobs.
